Script
update_NMD.py

Mapset
update_NMD

Description
Updates NMD with transmission lines (value 54) and recent fellings (value 130)

Necessary input data

- **nmd_gen_sv**
 - Original NMD land-use map. Can be clipped if desired but preferably kept with original extent.
- **fellings_[date]**
 - Import data from <https://www.skogsstyrelsen.se/laddanergeodata> into grass and save as fellings_[date]
- **power_lines**
 - Import data to grass from LM Topografi50 (ledningar) and save as power_lines

Usage

Run the script from a GRASS console within the given mapset.

When updating

Replace the input data (above) and update the script with the correct date for recent_fellings.
